

Blanking Plugs Heavy Duty

metric & BSPP

Blanking Plugs

P0182

BLANKING PLUGS

Material

Steel (self-colour & zinc-plated), stainless steel (A2 & A4), and brass.

are fine threads.

Inch threads beginning with „G“ indicate BSPP (British Standard Pipe Parallel threads ISO 228).

pressure, temperature, and material pairing

Also available on request with O rings (NBR, Viton, EPDM, Silicone etc), permanent magnet, and polyamide melt seal under head.

Technical Notes

To DIN 910. Most metric screw plug threads

Tips

Tightening torque is dependent on fluid,

Blanking Plugs with Collar

metric & BSPP

Blanking Plugs

P0183

BLANKING PLUGS

Material

Steel (self-colour & zinc-plated, class 5.8), stainless steel (A2 & A4), and brass.

Technical Notes

To DIN 908. Most metric screw plug threads are fine threads.

Inch threads beginning with „G“ indicate BSPP (British Standard Pipe Parallel

threads ISO 228).

For sealing washers (copper to DIN 7603A see part no. P0334).

Tightening torque is dependent on fluid, pressure, temperature, and material pairing.

Tips

Also available on request with O rings

(NBR, Viton, EPDM, Silicone etc), permanent magnet, and polyamide melt seal under head (PS).

ZP - Zinc Plated

A2 - A2 Stainless Steel

A4 - A4 Stainless Steel

BR - Brass

Blanking Plugs

Metric & BSPT

Blanking Plugs

P0184

BLANKING PLUGS

Material

Steel (self-colour & zinc-plated), stainless steel (A2 & A4), and brass.

Technical Notes

To DIN 906. Metric fine taper threads.

Inch threads beginning with „R“ indicate BSPT (British Standard Pipe Taper threads ISO 7).

Tightening torque is dependent on fluid, pressure, temperature, and material pairing.

BLANKING PLUGS

P0184.NL

Material

Steel (self-colour), stainless steel (A4) and brass.

Technical Notes

The Level Seal pressure plug has a 2° 5' taper thread extending its entire length and designed to provide a flush condition

with a standard 1° 47' tapered hole. It achieves a high pressure seal through the difference in taper, with dimensions pre-calculated to provide a higher sealing load near the large end of the plug and the threads near the top of the tapped hole. It is used in applications where high pressures are encountered and where protrusion is undesirable.

sion is undesirable.

Tightening torque is dependent on fluid, pressure, temperature, and material pairing.

Important Notes

For dry seal type plug see part P0184.NPT.

Blanking Plugs - Dry Seal

NPT and NPTF

Blanking Plugs

P0184.NPT

BLANKING PLUGS

Material

Steel (hardened or self-colour) and stainless steel (A4)

Technical Notes

To DIN 906. NPT (National Pipe Thread Taper) and NPTF (National Pipe Taper Fuel). The NPTF dry seal versions fit holes that are not as accurately tapped. Tightening torque is dependent on fluid, pressure, temperature, and material pairing.

Tips

NPTF threads will screw together with NPT threads and should have no noticeable assembly problem. There will most likely be an interference fit between the root and crest on either the major or minor diameter of the thread, depending on which part is NPTF. To accomplish a seal on the joint, a sealant will be required. NPTF threads are designed to screw together. They are designed to have interference at the roots and crests of the

threads on both the major and minor diameters. This interference should cause no assembly problem. The thread deformation caused by the interference fit and the wrench tightening is designed to make a dry mechanical seal.

Important Notes

For level of flush type plug see part P0184.NL.

Hexagon Blanking Plugs

Blanking Plugs

P0187

BLANKING PLUGS

Material

Steel (self-colour), stainless steel (A4, AISI 316) or brass.

Technical Notes

To DIN 7604A. Most metric screw plug

threads are fine threads.

Tightening torque is dependent on fluid, pressure, temperature, and material pairing.

Tips

Also available on request with O rings (NBR, Viton, EPDM, Silicone etc), permanent magnet, and polyamide melt seal under head.

**P0182**Hex head screw blanking plugs
DIN 910**P0183**Hex socket screw blanking plugs
DIN 908**P0184**Hex socket taper blanking plugs
DIN 906**P0184.NPT**Hex socket blanking plugs NPT
and NPTF dry seal**P0184.NL**Hex socket blanking plugs level
seal**P0187**Hexagon blanking plugs DIN
7604 A**Threads**

Blanking plugs come with either metric or inch threads. Most metric threads are fine threads (to DIN 13).

Inch threads come in four types:

G indicates BSPP British Standard pipe parallel (to ISO 288)

R indicates BSPT British Standard pipe taper (to ISO 7)

NPT indicates National Standard pipe taper (to ANSI B1.20.1)

NPTF indicates National Standard pipe taper fuel dry seal (to ANSI B1.20.3)

NL indicates National Standard pipe taper fuel level seal (to ANSI B1.20.3)

Materials

Blanking Plugs are available in three material types:

Steel (untreated or zinc plated)

Stainless steel (A2, AISI 303 and A4, AISI 316)

Brass

Options: with built-in magnet or with NBR seal and O Ring.

NPT and NPTF pipe threads

The two most common US standard taper pipe threads used are National Pipe Taper (NPT) and National Pipe Taper Fuel (NPTF). Applications range from electrical conduits and hand railings to high-pressure pipe lines that carry gas or caustic fluids. NPT threads are for mechanical or low-pressure air or fluid applications and often require the use of sealing compounds like Teflon tape, to provide the seal. When the application is more critical, and the sealing compound may fail due to high heat or pressure, NPTF Dryseal threads are used. This mechanical seal is produced by the mating and slight crushing of the threads when a wrench is applied to tighten the fittings.
