

R4100

AIR MOTORS

Material

Precision air motor of stainless steel body and aluminium construction. The balanced rotor is positioned between precision ball bearings which virtually eliminates friction and wear. A hardened planetary gear system provides increased torque transmission capabilities and long-life.

Technical Notes

For medical, robotic and industrial applications. Gears slip above the torque*. Figures below relate to average free speed and stall torque specifications at 90 psi. Maximum shaft loading 7,5Kg. **Please read operating and installation manual carefully, to ensure product life.**

Tips

Shaft seals available for units having free speeds of 2000 rpm or less. If you require a sealed motor please clearly specify when ordering and add -S to part number.

LF=lubrication free version
