

Motor Lead Screw XY Stages

cross roller

Manual Positioning Stages

L3175

MANUAL POSITIONING STAGES

Material

Cast iron body (ENGJL-250), with hardened cross roller linear rail set. Hardened and ground lead screw, pitch accuracy $\pm 0.02\text{mm}/300\text{mm}$.

Can also be supplied with an aluminium body when lighter weight stages are required (approx. 50% of weight of standard slides and have 50% of the load capacity).

Technical Notes

Suitable for horizontal and vertical applications requiring smooth movement, long

life and high load capacity. Other versions are also available - dovetail slides (L3480) for vibration damping, and needle roller slides (L3490) for even higher load ratings. Load ratings are based on even surface loading with the slide in the centre position, and apply to a single slide. Coefficient of friction 0,003. Speeds up to 3000 rpm, max. 20 m/min. Positioning accuracy up to $\pm 0.015\text{mm}$.

Tips

Replace -* with
-XY for XY axis stage

-XYB for XY axis stage with bellows
-XYI for inverse X axis stage with bellows.

Optionally with ball screw not lead screw. When limit switches are installed the stroke is reduced by approx. 20mm.

Important Notes

See technical pages for straightness and parallelism accuracy and standard carriage and base fixing holes - other fixing holes can be machined on request. 3D CAD models available.

Heavy duty linear stages

Plain stages 	Lead screw & handle 	Lead screw & knob 
XYθ stage 	Motorised stage 	XY stage 

Available with the following sliding elements:

Cross roller:	For medium loads, low friction.
Dovetail:	Less expensive, higher friction, higher loads.
Needle roller:	Highest loads, low friction, more expensive.

Moment loads

All loads shown in tables are based upon an evenly distributed load with slide in centre position. All loads apply to a single slide.

	• Crossed roller	• Dovetail	• Needle roller

20	30	600	Dovetail	1210	100	80

Height tolerance for roller and dovetail slides
 $\pm 0,01\text{mm}$. DIN 7168 medium is the dimensional variations of the sliders. Closer tolerances upon request.

Rectangularity of XY-tables
 $\pm 0,005\text{mm}$ per 100mm slide length

Locking device

Either mounted on a side plate, a swivel rod or direct to slideway - dependent on stage type.

Bellows

Recommended for general industrial applications. The installation of bellows affects the stroke, height and width of the slide. The bellows are made of PVC and can be used at temperatures up to 80° consult us for dimensions.

Swivelling plates

These can be rotated 360° in graduations of 10°. Graduations of 10° up to 90° clockwise and counter-clockwise.

Motor adaptors

For slides with a width greater than 75mm, a flanged motor adaptor with coupling can be provided. Please advise motor size.

Mounting brackets

From cast iron or on request aluminium.
