

Anti-vibration Bushes

silicone gel, two-piece

Anti-Vibration Components

P2071

ANTI-VIBRATION COMPONENTS

Material
Silicone gel.

Technical Notes
This anti-vibration bush is ideal for applications with very light loads, such as PCBs and computer components. This range is handmade and has a unique molecular

structure that spreads the impact three dimensionally. This gives it outstanding vibration and shock absorbing properties. It is able to dampen to lower frequencies than bushes made of neoprene or rubber. These effective qualities are reflected in the cost. For a lower cost alternative

please see part number P2072.

Important Notes
The double washer mounts are made of two parts of gel, one of which incorporates an internal metal bush which acts as a guide.

Order No.	d ₁	h ₁	d ₂	d ₃	d ₄	h ₂	h ₃	Resonance point Hz	Resonance magnification dB	Recommended frequency Hz	Optimum working load kgf
